

# Railway Resume Customization Recommendations

**Professional Headline:** Technical Operations & Automation Engineer

## Professional Summary

Technical operations professional with experience designing automation, internal tooling, and business intelligence systems that improve organizational efficiency. Built workflow automations, operational dashboards, and AI assisted processes supporting customer success operations and executive decision making. AWS Solutions Architect Associate certified with hands on experience in cloud infrastructure, process optimization, and cross functional operations.

## Blueprint Test Preparation

Technical Operations Specialist | Mar 2022 – Present

- Designed and implemented five internal automation systems using Google Apps Script, Google Sheets, AI tooling, and external APIs to improve operational efficiency across Customer Success workflows.
- Built a lifecycle based outreach platform for self paced learners that automatically tracks exam timelines and delivers personalized communications at key milestones, replacing manual intervention with scalable automation.
- Optimized existing automation pipelines by reducing unnecessary API calls, eliminating approximately one hour of weekly processing delays and removing a major operational bottleneck.
- Designed executive business intelligence dashboards used by leadership to monitor cohort performance, product health, and student lifecycle metrics, improving organizational visibility into operational outcomes.
- Built a centralized operations dashboard to manage survey response workflows, communication tracking, and follow up status across multiple internal stakeholders.
- Partnered across Customer Success, Academic Services, and leadership teams to identify operational pain points, translate requirements into technical solutions, and improve internal processes.
- Evaluated, implemented, and administered SaaS tools to solve emerging operational needs while documenting workflows and supporting team adoption.

## Selected Technical Projects

### AWS Infrastructure as Code

- Designed cloud infrastructure using Terraform, ECS Fargate, Application Load Balancer, Cognito authentication, IAM, Route 53, and private networking.
- Built production style cloud environments emphasizing security, automation, and repeatable deployments.

### Business Intelligence Platform

- Developed executive dashboards surfacing product performance, student lifecycle analytics, and operational KPIs to support strategic decision making.

### Workflow Automation

- Built internal automation systems integrating Google Workspace, Apps Script, AI models, and external APIs to eliminate repetitive operational work.

## Skills

Technical: Python, Google Apps Script, JavaScript, SQL, AWS, Terraform, Docker, Git, Linux, Google Workspace APIs, REST APIs, AI and LLM Integration

Operations: Workflow Automation, Business Intelligence, Dashboard Development, Process Improvement, Cross Functional Project Management, SaaS Administration, Documentation, Operational Analytics

Cloud: ECS, IAM, Route 53, Cognito, VPC, Application Load Balancers, Infrastructure as Code

## **Certifications**

- AWS Certified Solutions Architect – Associate (SAA C03)
- AWS Certified Cloud Practitioner
- Microsoft 365 Fundamentals (MS 900)
